Projects

Music App Build With React Js

Build a music app, which is inspired by Spotify my main obstacles while building a music app is managing state and I solved with a library using the easy-peasy library which is built upon redux.

Books Project build with Angular

Build a book app to download and see the reviews and ratings of the books, using libgen API, The main problem I have gone through building this is when embedding the HTML coming from good reads API, I solved it using pipes in angular.
